WORLD STANDARDS DAY 2024

#WSD2024 - Shared vision for a better world: Spotlight on SDG 9
Industry, Innovation, and Infrastructure in the age of #AI

About the Theme

#International Standards: Key to Responsible #AI!

International Standards help achieve #SDG 9 - Industry, Innovation & Infrastructure. This year, the focus on the Role of the Standardization community in creating Safe and Sustainable AI Standards

SDG 9 focuses on building resilient infrastructure, promoting inclusive and sustainable industrialization, and fostering innovation.

International Standards are the backbone of global progress. They ensure interoperability, security, and sustainability, fostering global collaboration to accelerate innovation through AI.

International Standards offer practical solutions we can all stand behind. By using international standards, all stakeholders can become a part of the solution.

Program Objective

All of us, as stakeholders can collectively build a world where Resilient Infrastructure, Sustainable Industrial Growth, and cutting-edge Innovation – powered by Artificial Intelligence and supported by International Standards – drive economic transformation, today and for future generations.

Hence the program is designed to create awareness to industry and stakeholders on building Responsible AI Standards for driving Resilient Innovations, Industry and Infrastructural Growth.
